SOLD BY

BERNARD M'MAHON,
No. 39, SOUTH SECOND STREET, PHILADELPHIA:

WHO HAS LIKewise FOR SALE,

PLANTS

Of above fifty varieties of the most superior English, Irish & Scotch

GOOSEBERRIES.

PHILADELPHIA:

PRINTED BY WILLIAM DUANE.
THE necessity of a general repository of seeds of Garden Vegetables, of the Grasses, Grains and Roots, used in Rural Economy; of plants used in dying and other arts, and of useful Trees, ornamental Shrubs, &c. as well those which are commonly cultivated amongst us, as the various indigenous and foreign important productions, not yet introduced into our fields or gardens, must be obvious to every person who has the prosperity and welfare of his country at heart. I have attempted, with all my means and industry, an institution of this kind, and I flatter myself that it has been already found of some importance to the community. But, in order to enable me to persevere with additional advantage, I solicit the assistance of the lovers of improvement in every part of the United States, and the territories thereto belonging, to transmit me seeds of the various trees, shrubs, grasses and other herbaceous plants (with or without names) growing in an indigenous state in their respective vicinities, or obtained by them from friends in other places; for which I will send them, in exchange, the seeds of culinary vegetables, grasses, fruits, or such other kinds as they may desire, and in my power to procure. What I can spare of those from my own course of experiments, I mean to exchange with the various Botanical and Agricultural institutions of other nations, for such plants as are adapted to, or capable of being naturalized in the different regions of the Union; and by this means, make an effort to introduce into the country, for permanent cultivation, all the important vegetable productions of the temperate zones, as well as several of the torrid.

I have added to my seed establishment, a Botanical, Agricultural and Horticultural Book-
Store; where every valuable work, ancient or modern, on those subjects, may be had on moderate terms; and I have recently published, an extensive treatise on Gardening, entitled "The American Gardeners' Calendar; adapted to the climates and seasons of the United States; (price $3 50) containing a complete account of all the work necessary to be done in the

Kitchen-Garden,  Pleasure-Ground,  
Fruit-Garden,     Flower-Garden,  
Orchard,         Green-House,  
Vineyard,        Hot-House, and  
Nursery,         Forcing-Frames,  

For every month in the year; with ample practical directions for performing the same. Also, general, as well as minute instructions for laying out, or erecting, each and every of the above departments, according to modern taste, and the most approved plans; the ornamental planting of pleasure-grounds, in the ancient and modern style; the cultivation of Thorn Quicks and other plants, suitable for Live Hedges, with the best methods of making them, &c. To which are annexed, extensive catalogues of the different kinds of plants, (near 3700) which may be cultivated either for use or ornament in the several departments, or in rural economy; divided into eighteen separate classes, according to their habits, duration, and modes of culture; with explanatory introductions, marginal marks, and their true Linnean or Botanical, as well as English names; together with a copious index to the body of the work."

The articles mentioned in the succeeding pages being principally intended for domestic consumption, and being but a small portion of my general assortment, I refer the curious, and those who are desirous of sending seeds of the indigenous trees, shrubs, and herbaceous plants of this country, as well as of South America, the East and West Indies, South Sea Islands, Japan, China, &c. to their friends in Europe or elsewhere, to my general Catalogue of American and foreign Seeds.
A CATALOGUE

OF

GARDEN, HERB, FLOWER, TREE, SHRUB

AND

GRASS SEEDS, &c.

The scientific names are annexed to the common, for the accommodation of such Ladies, Gentlemen, and Gardeners, as desire to become acquainted with them, and to prevent misconceptions of the articles required by purchasers.

Mc. Mahon, is constantly supplied with thorn quicks, for the formation of live hedges, and with every article, either curious or useful, in his line of business.
Very clever job. $50 for a 6. 8½ will do for an acre. Not much with cheap

but to be had. We must settle - pay
not to be left.

Her kind love.

I'm sure 25 6. 50. So, I will not

be bound to you. I have

paid 20. Was the survey

for the land.
